## Investment Highlights

• Hormel is primarily engaged in the production of a variety of meat and food products and the marketing of those products. Pork, turkey, nuts, beef, and chicken are major raw materials for its products. Key brands include Skippy peanut butter, Jennie-O Turkey Store turkey products, the SPAM family of products, Hormel Pepperoni, and Planters snack nuts.

• Hormel has posted 55+ years of consecutive dividend increases. Management has made maintaining Hormel's listing as a Dividend Aristocrat a priority. The company boasts 'A-rated' credit ratings. Hormel is a highly acquisitive firm, aided by its financial strength.

• In recent fiscal years, Hormel has placed a greater emphasis on selling branded, value-added products versus commodity fresh meat products. Inflationary headwinds have been material of late, and the pricing strength selling branded products generates versus selling commodity fresh meat products has helped Hormel better navigate inflationary hurdles. Near-term pressures persist, however.

• In July 2021, Hormel acquired the Planters snack nut business from Kraft Heinz for roughly $3.35 billion in cash or ~$2.8 billion net after expected tax benefits. This deal significantly grew Hormel's snack offerings. The firm captured millions in run-rate synergies.

• Please be aware that our valuation model is optimistic, supported by cost control measures and decent revenue expansion, supported by organic sales growth at Hormel. Should Hormel stumble, our fair value estimate would be revised lower.

## Relative Valuation

## Structure of the Food Products Industry — NEUTRAL

The food products industry is composed of a number of firms with strong brand names. However, market supply/demand dynamics and intense competition still impact product prices, while fluctuations in commodity costs can make earnings quite volatile. Private-label competition, competitors' promotional spending, and changing consumer preferences often drive demand trends. The group's customers—such as supermarkets, warehouses, and food distributors—continue to consolidate, increasing buying power over constituents and hurting margins. Still, we're generally neutral on the group.

|---|---|---|---|---|---|
| Attractive | $31.00 | $25.00 - $37.00 | LARGE-CAP VALUE | Consumer Staples | Recession Resistant |

## Economic Profit Analysis

### ValueCreation™ EXCELLENT

The best measure of a firm's ability to create value for shareholders is expressed by comparing its return on invested capital (ROIC) with its weighted average cost of capital (WACC). The gap or difference between ROIC and WACC is called the firm's economic profit spread. Hormel Foods' 3-year historical return on invested capital (without goodwill) is 18.7%, which is above the estimate of its cost of capital of 8.5%. As such, we assign the firm a ValueCreation™ rating of EXCELLENT. In the chart to the right, we show the probable path of ROIC in the years ahead based on the estimated volatility of key drivers behind the measure. The solid grey line reflects the most likely outcome, in our opinion, and represents the scenario that results in our fair value estimate.

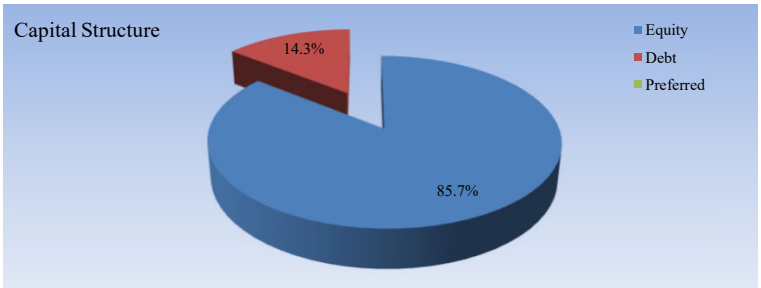
| | |
|---|---|
| ROIC - WACC Spread, 3-year historical average | 10.2% |
| ROIC - WACC Spread, 5-year projected average | 12.9% |

These spreads equal the firm's annual average ROIC (excluding goodwill) less its WACC.

### ValueTrend™ POSITIVE

Hormel Foods receives a ValueTrend™ rating of POSITIVE, which is based on the company's trailing three-year performance. The firm's ROIC (excluding goodwill) increased to 20.5% last year from its trailing 3-year average of 18.7%. We expect ROIC (excluding goodwill) to be in the ballpark of about 24% by the end of our discrete forecast period, with upside potential to about 28% over that time period.

### Weighted Average Cost of Capital (WACC)



**Cost of Equity**

| | |
|---|---|
| Risk Free Rate Assumption | 4.3% |
| Fundamental Beta (ERP multiplier) | 0.8 |
| Estimated Equity Risk Premium | 6.5% |
| **Cost of Equity Assumption** | **9.2%** |

**After-tax Cost of Debt**

| | |
|---|---|
| Risk Free Rate Assumption | 4.3% |
| Synthetic Credit Spread | 1.73% |
| Cost of Debt Assumption | 6.0% |
| Cash Tax Rate Assumption | 20.0% |
| **After-tax Cost of Debt Assumption** | **4.8%** |

**Cost of Preferred Stock**

| | |
|---|---|
| Preferred Dividends | 0 |
| Value of Preferred Stock | 0 |
| Cost of Preferred Assumption | NA |

| | |
|---|---|
| **Weighted Average Cost of Capital (WACC)** | **8.5%** |

ERP = Equity Risk Premium

### Return on Invested Capital (ROIC)

The graph above shows the firm's ROIC (excluding goodwill) compared with historical averages and its WACC.

### Assessment of Company Dividend Strategy

### Key Strengths

Hormel has a fantastic track record of consecutive annual dividend increases having increased its payout over the past 55+ consecutive years. The firm aims to grow its value-added product sales going forward, as compared to commodity fresh meat products. Hormel's brand leadership is expected to be a key driver of top-line growth while offering potential pricing strength. The firm remains committed to growing its dividend after acquiring the Planters snack nut business from Kraft Heinz in June 2021. We expect that Hormel will continue pushing through meaningful dividend increases, but we emphasize that our future free cash flow forecasts are quite optimistic.

### Potential Weaknesses

Hormel has a long history that spans from meat processor in the late 19th century to packaged food giant in the 21st century. There is not much that can derail Hormel's dividend growth trajectory, in our view. Share buybacks and acquisitions compete for capital against its dividend program and the firm has a net debt position, but management continues to place a great emphasis on payout growth. We expect Hormel will continue growing its dividend going forward as the company remains a tremendous generator of free cash flow. Hormel's financial performance proved resilient during various public health crises over the past decade such as the avian flu outbreak and the COVID-19 pandemic.

Note: Valuentum may provide an adjusted ROIC measure to better reflect the economic substance of a company's operations, as in the case of companies with negative invested capital.

# Hormel Foods HRL FAIRLY VALUED

Buying Index™ 6 Value Rating

| Economic Castle | Estimated Fair Value | Fair Value Range | Investment Style | Sector | Industry |
|---|---|---|---|---|---|
| Attractive | $31.00 | $25.00 - $37.00 | LARGE-CAP VALUE | Consumer Staples | Recession Resistant |

## Growth Analysis

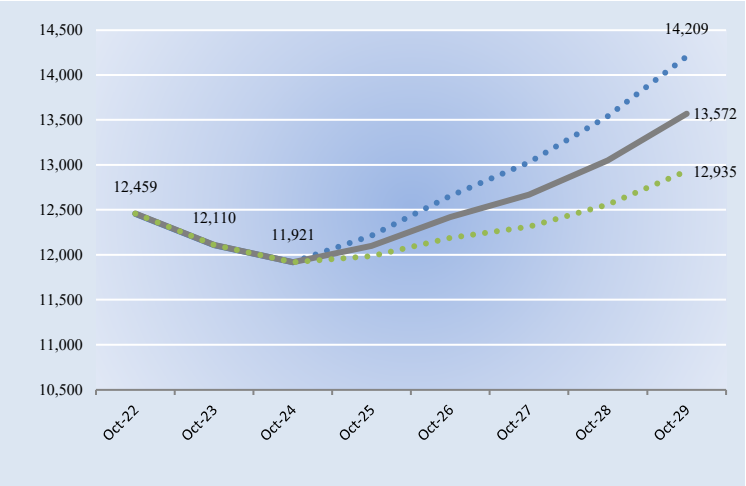
### Revenue Growth — MODEST

| | | Last Fiscal Year Revenue | 3-year Historical CAGR | 5-year Projected CAGR |
|---|---|---|---|---|
| **Hormel Foods** | USD | **11,921** | **1.5%** | **2.6%** |
| Coca-Cola | USD | 47,061 | 6.8% | 4.4% |
| Philip Morris | USD | 37,878 | 6.4% | 6.7% |
| Procter & Gamble | USD | 84,039 | 1.6% | 3.5% |
| Wal-Mart | USD | 680,985 | 5.9% | 4.7% |
| Peer Median | | | 6.2% | 4.6% |
| Industry Median | | | 3.7% | 2.8% |

Hormel Foods' revenue expansion has trailed the median of both its peer group and its industry group during the past three years. We expect the firm's pace of revenue growth to fall below the median of both its peer group and industry group during the next five years. Our growth assessment of each firm is based on the firm's 5-year forward revenue CAGR. Hormel Foods' future pace of revenue growth is MODEST, in our opinion.

### Projected Revenue (in millions of USD)

Source: Company Filings, Valuentum Projections



In the chart above, we show our baseline forecast for revenue as well as potential upside and downside cases.

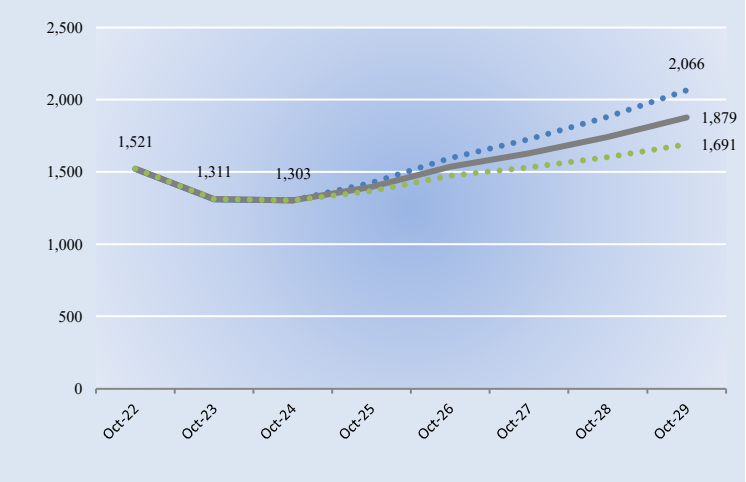
### EBITDA Growth

| | | Last Fiscal Year EBITDA | 3-year Historical CAGR | 5-year Projected CAGR |
|---|---|---|---|---|
| **Hormel Foods** | USD | **1,303** | **-0.6%** | **7.6%** |
| Coca-Cola | USD | 15,376 | 6.1% | 8.5% |
| Philip Morris | USD | 15,002 | 2.2% | 10.5% |
| Procter & Gamble | USD | 23,844 | 4.0% | 7.8% |
| Wal-Mart | USD | 42,321 | 5.0% | 13.7% |
| Peer Median | | | 4.5% | 9.5% |
| Industry Median | | | 2.6% | 5.9% |

Hormel Foods' EBITDA expansion has trailed both that of its peer group and its industry group during the past three years. We expect the firm's EBITDA to trail its peer group but outpace that of its industry group during the next five years. Wal-Mart sports the highest EBITDA growth rate among peers.

### Projected EBITDA (in millions of USD)

Source: Company Filings, Valuentum Projections



In the chart above, we show our baseline forecast for EBITDA as well as potential upside and downside cases.

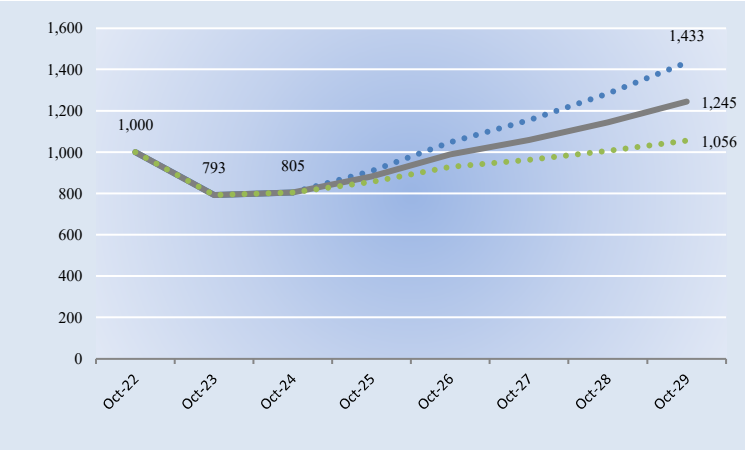
### Net Income Growth

| | | Last Fiscal Year Net Income | 3-year Historical CAGR | 5-year Projected CAGR |
|---|---|---|---|---|
| **Hormel Foods** | USD | **805** | **-4.0%** | **9.1%** |
| Coca-Cola | USD | 10,631 | 2.9% | 10.4% |
| Philip Morris | USD | 7,057 | -8.2% | 18.7% |
| Procter & Gamble | USD | 14,879 | 1.3% | 11.2% |
| Wal-Mart | USD | 19,436 | 12.4% | 19.6% |
| Peer Median | | | 2.1% | 15.0% |
| Industry Median | | | 2.6% | 10.4% |

Hormel Foods' net income expansion has trailed both that of its peer group and its industry group during the past three years. We expect the firm's pace of net income growth to fall below that of both its peer group and industry group during the next five years. Wal-Mart sports the highest net income growth rate among peers.

### Projected Net Income (in millions of USD)

Source: Company Filings, Valuentum Projections



In the chart above, we show our baseline forecast for net income as well as potential upside and downside cases.

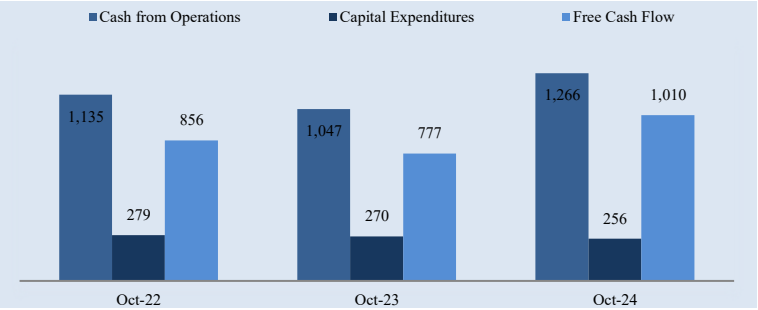
## Cash Flow and Financial Leverage Analysis

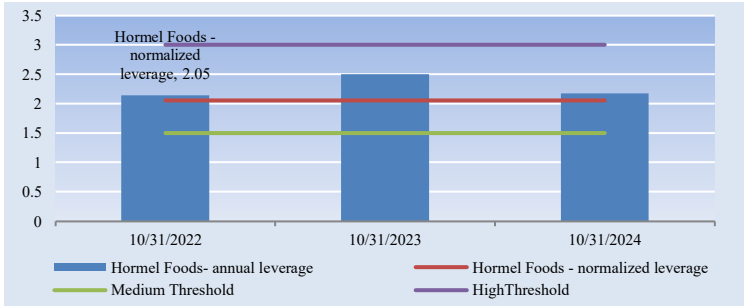
### Cash Flow Generation — STRONG



The bars above show the firms operating cash flow, capital expenditures, and free cash flow, respectively.

Firms that generate a free cash flow margin (free cash flow divided by total revenue) above 5% are usually considered cash cows. Hormel Foods' free cash flow margin has averaged about 7.3% during the past 3 years. As such, we think the firm's cash flow generation is relatively STRONG. The free cash flow measure shown above is derived by taking cash flow from operations less capital expenditures and differs from enterprise free cash flow (FCFF), which we use in deriving our fair value estimate for the company. For more information on the differences between these two measures, please visit our website at Valuentum.com. At Hormel Foods, cash flow from operations increased about 12% from levels registered two years ago, while capital expenditures fell about 8% over the same time period.

### Financial Leverage — MEDIUM



The bars above show the firm's annual debt-to-EBITDA. The red line shows the firm's normalized measure.

Firms that exhibit high leverage tend to be more risky than firms with relatively low debt loads, all else equal. We measure financial leverage by taking a firm's current total debt load and dividing it by the firm's trailing average 3-year annual EBITDA. Firms that are over 3 for this metric, we rate as having high leverage. Companies that have less than 1.5 turns of leverage (or a measure below 1.5), we rate as having low leverage. Hormel Foods' normalized debt-to-EBITDA measure of about 2.05 puts it in the MEDIUM camp.

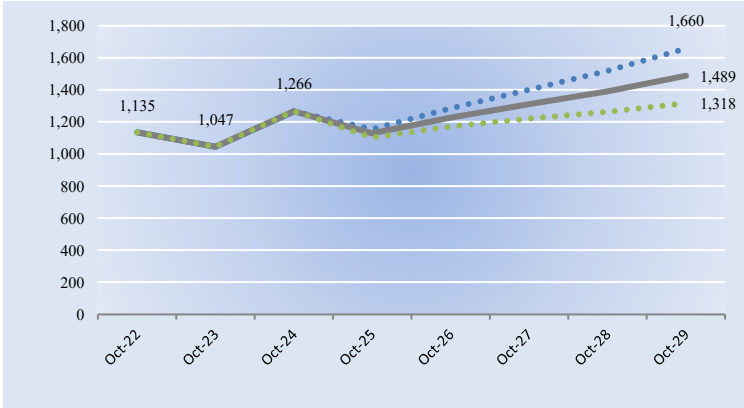
### Cash Flow from Operations

| | | Last Fiscal Year CFO | 3-year Historical CAGR | 5-year Projected CAGR |
|---|---|---|---|---|
| **Hormel Foods** | USD | **1,266** | **8.1%** | **3.3%** |
| Coca-Cola | USD | 6,805 | -18.6% | 24.0% |
| Philip Morris | USD | 12,217 | 0.7% | 9.5% |
| Procter & Gamble | USD | 19,846 | 2.6% | 9.7% |
| Wal-Mart | USD | 36,443 | 14.7% | 15.1% |
| Peer Median | | | 1.6% | 12.4% |
| Industry Median | | | 3.0% | 8.8% |

Hormel Foods' cash flow from operations expansion has been greater than that of both its peer group and industry group during the past three years. We expect the firm's pace of cash flow from operations growth to fall below that of both its peer group and industry group during the next five years. Coca-Cola sports the highest expected cash flow from operations growth rate among peers.

### Projected Operating Cash Flow (in millions of USD)

Source: Company Filings, Valuentum Projections



In the chart above, we show our baseline forecast for CFO as well as potential upside and downside cases.

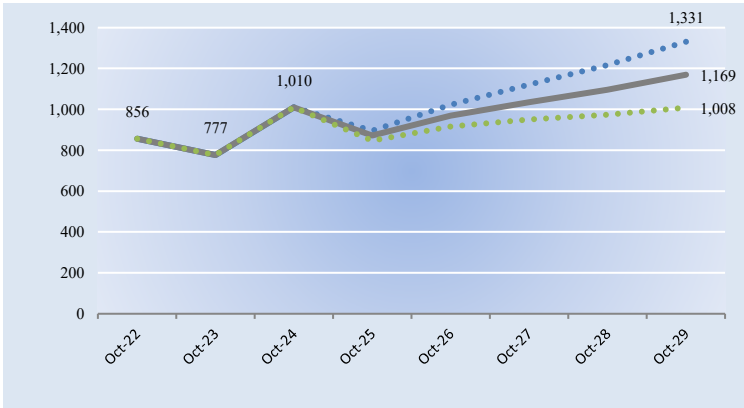
### Free Cash Flow (CFO-capital expenditures)

| | | Last Fiscal Year FCF | 3-year Historical CAGR | 5-year Projected CAGR |
|---|---|---|---|---|
| **Hormel Foods** | USD | **1,010** | **9.5%** | **3.0%** |
| Coca-Cola | USD | 4,741 | -25.0% | 30.8% |
| Philip Morris | USD | 10,773 | -1.3% | 10.4% |
| Procter & Gamble | USD | 16,524 | 2.0% | 11.0% |
| Wal-Mart | USD | 12,660 | 4.6% | 31.1% |
| Peer Median | | | 0.3% | 20.9% |
| Industry Median | | | 1.7% | 10.4% |

Hormel Foods' free cash flow expansion has been greater than that of both its peer group and industry group during the past three years. We expect the firm's pace of free cash flow growth to fall below that of both its peer group and industry group during the next five years. Wal-Mart sports the highest expected free cash flow growth rate among peers.

### Projected Free Cash Flow (in millions of USD)

Source: Company Filings, Valuentum Projections



In the chart above, we show our baseline forecast for free cash flow as well as potential upside and downside cases.

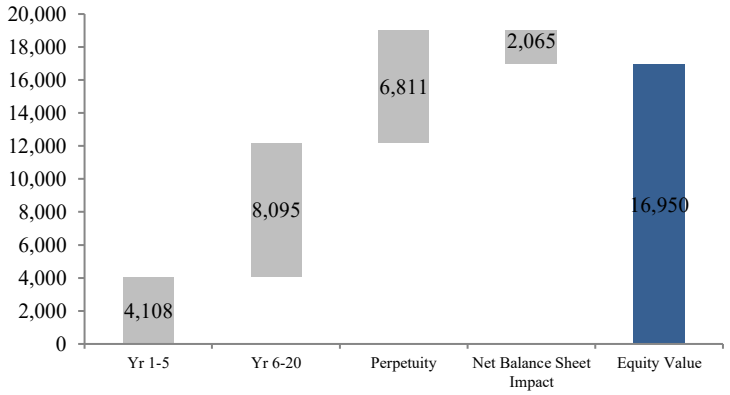
### Valuation Breakdown

In the chart below, we show the build up to our estimate of total enterprise value for Hormel Foods and the break down to the firm's total equity value, which we estimate to be about 16.95USD billion. The present value of the enterprise free cash flows generated during each phase of our model and the net balance sheet impact is displayed. We divide total equity value by diluted shares outstanding to arrive at our $31 per share fair value estimate.



In Millions of USD

### DCF Valuation Summary

We think Hormel Foods is worth $31 per share with a fair value range of $25.00 - $37.00. The margin of safety around our fair value estimate is driven by the firm's LOW ValueRisk™ rating, which is derived from an evaluation of the historical volatility of key valuation drivers and a future assessment of them. Our near-term operating forecasts, including revenue and earnings, do not differ much from consensus estimates or management guidance. Our model reflects a compound annual revenue growth rate of 2.6% during the next five years, a pace that is higher than the firm's 3-year historical compound annual growth rate of 1.5%. Our model reflects a 5-year projected average operating margin of 10.6%, which is above Hormel Foods's trailing 3-year average. Beyond year 5, we assume free cash flow will grow at an annual rate of 3% for the next 15 years and 3% in perpetuity. For Hormel Foods, we use a 8.5% weighted average cost of capital to discount future free cash flows.

### Enterprise Free Cash Flow

| Fiscal Year End: | 10/31/2022 | 10/31/2023 | 10/31/2024 |
|---|---|---|---|
| Earnings before Interest | 950 | 873 | 1,064 |
| + Depreciation | 213 | 227 | 234 |
| - Capital Expenditures | 279 | 270 | 256 |
| - Change in Working Capital | 272 | 5 | -78 |
| - Acquisitions | 0 | 0 | 0 |
| Enterprise Free Cash Flow (FCFF) | 612 | 825 | 1,120 |

In Millions of USD

Our future forecasts for key valuation drivers result in a future free enterprise cash flow stream. Above, we show how we calculate enterprise free cash flow and the historical performance of the metric for Hormel Foods. Over the next five years, we expect the firm's enterprise free cash flow to expand at about a 1% compound annual growth rate. During years 6 through 20, we expect the measure to grow at a 3% rate. Beyond year 20 (in perpetuity), we grow the firm's free cash flow at inflation (3%).

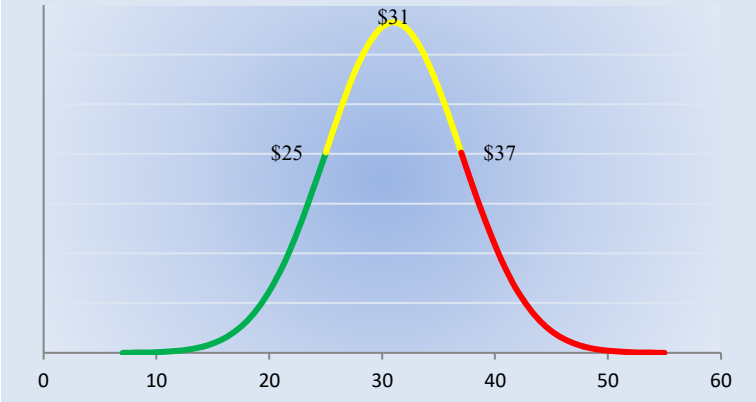
### Range of Potential Outcomes



Our discounted cash flow process values each firm on the basis of the present value of all future free cash flows. Although we estimate the firm's fair value at about $31 per share, every company has a range of probable fair values that's created by the uncertainty of key valuation drivers (like future revenue or earnings, for example). After all, if the future were known with certainty, we wouldn't see much volatility in the markets as stocks would trade precisely at their known fair values. Our ValueRisk™ rating sets the margin of safety or the fair value range we assign to each stock. In the graph above, we show this probable range of fair values for Hormel Foods. We think the firm is attractive below $25 per share (the green line), but quite expensive above $37 per share (the red line). The prices that fall along the yellow line, which includes our fair value estimate, represent a reasonable valuation for the firm, in our opinion.

### ValueRisk™ LOW

Hormel Foods receives a ValueRisk™ rating of LOW based of the historical volatility of key drivers of economic value creation. The fair value range sets the margin of safety around our fair value estimate of the firm's shares.

| | |
|---|---|
| Revenue Volatility | 3.8% |
| Gross Margin Volatility | 4.7% |
| Earnings (EBI) Volatility | 10.5% |
| Cash Flow (FCFF) Volatility | Greater than 50% |
| Fair Value Range | 20.0% |

The Fair Value Range sets the premium or discount on our estimate of the firm's fair value.

### Upside and Downside Probabilities

| | |
|---|---|
| Probability (fair value < $0) | Less than 0.1% |
| Probability (fair value > 2x current share price) | 0.00% |

We strive to answer a few questions that investors often ask: 1) What are the chances of a total loss of investment in this company? and 2) What is the chance that the company is really worth twice what I paid for it? The probability (fair value < 0) strives to answer the first question. It indicates the chance that the firm may encounter insolvency based on the characteristics of its cash flow stream, capital structure, and risk profile. The probability (fair value > 2x current share price) strives to answer the second question. It is our best estimate of whether investors are participating in a half-off sale by buying the company's shares at current prices.

### Future Path of Fair Value

We estimate Hormel Foods' fair value at this point in time to be about $31 per share. As time passes, however, companies generate cash flow and pay out cash to shareholders in the form of dividends. The chart to the right compares the firm's current share price with the path of Hormel Foods' expected equity value per share over the next three years, assuming our long-term projections prove accurate. The range between the resulting downside fair value and upside fair value in Year 3 represents our best estimate of the value of the firm's shares three years hence. This range of potential outcomes is also subject to change over time, should our views on the firm's future cash flow potential change. The expected fair value of $36 per share in Year 3 represents our existing fair value per share of $31 increased at an annual rate of the firm's cost of equity less its dividend yield. The upside and downside ranges are derived in the same way, but from the upper and lower bounds of our fair value estimate range.

The graph above shows the expected future fair value of the firm's shares relative to its current stock price.

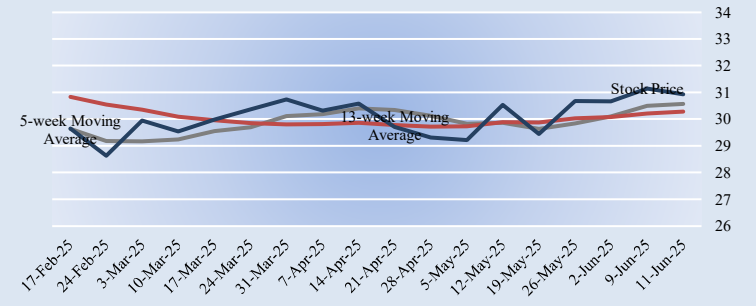
|---|---|---|---|---|---|
| Attractive | $31.00 | $25.00 - $37.00 | LARGE-CAP VALUE | Consumer Staples | Recession Resistant |

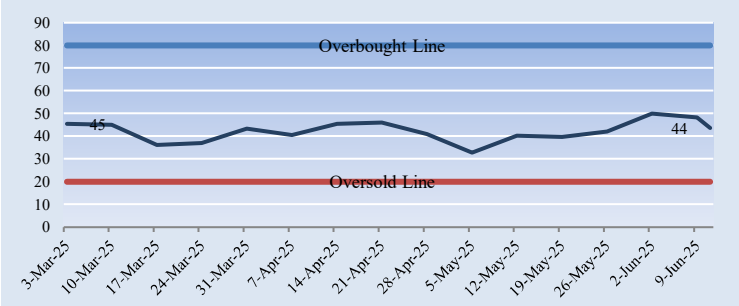
## Technical Analysis

### Technical Evaluation — BULLISH



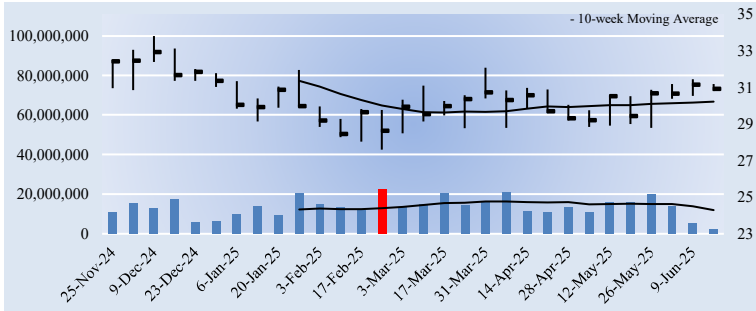
The firm's near-term moving average (5-week, grey line) and medium-term moving average (13-week, red line) are shown in the chart above. Typically, when a shorter-term moving average crosses a medium- or longer-term moving average from below, it represents a bullish signal. If the short-term moving average crosses from above, traders often view this as bearish. Hormel Foods' 5-week moving average resides above its 13-week measure, indicating a BULLISH trend. Such a move could indicate a reversal in the firm's 30-week downtrend.

### Money Flow Index (MFI) — NEUTRAL



The Money Flow Index (MFI) is an oscillator that uses price and volume to measure buying and selling pressure. Chartists often look for overbought (above 80) and oversold (below 20) levels to warn of unsustainable near-term price extremes. Hormel Foods' MFI of 44 (green line) is neutral, suggesting the firm's stock is neither overbought nor oversold at this time. However, a score below 50 tends to favor bears. The MFI can also be used to gauge the strength or weakness of a firm's price trend. In Hormel Foods' case, its stock price and money flow neither reveals a bullish nor bearish divergence, further supporting our neutral view on its money flow action.

### 30-week Price and Volume Chart (weekly)



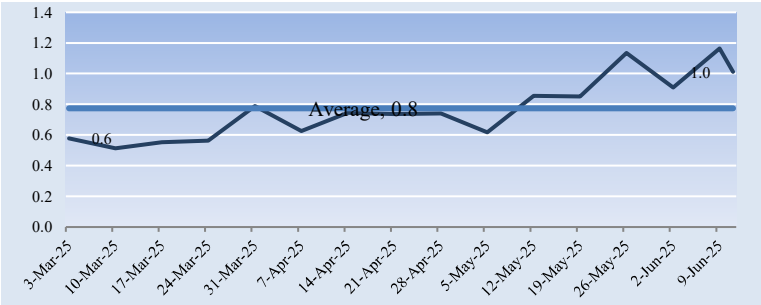
In the chart above, we pinpoint the heaviest accumulation or distribution week of the firm, determined by the week with the highest trading volume during the past 30 weeks. A heavy accumulation (buying) or distribution (selling) week often determines the future near-term direction of the firm's share price, as money managers continue to move in or out of the stock in the days and weeks ahead driving the stock up or down, respectively. For Hormel Foods, the week with the highest trading volume out of the last 30 weeks was a week of heavy selling, or distribution (red bar). Such market activity could indicate a reversal of an uptrend or further confirmation of a downtrend.

### Relative Price Strength — STRONG

A firm's relative price strength can be assessed over any number of time horizons. We show the firm's performance over the past 5 weeks, 13 weeks, and 30 weeks below. In arriving at our relative strength rating for each company, we assess the past 13 weeks, which includes the market's reaction to the firm's most recently reported quarter, where applicable, and other more recent economic events. During the past 13 weeks, Hormel Foods' shares returned 4.1%, while the market benchmark returned -4.1%. We think Hormel Foods' 13-week relative price performance is STRONG.

| | |
|---|---|
| 5-week Company Performance | 1.4% |
| 5-week Market Benchmark Performance | -7.2% |
| 5-week Relative Performance vs. Market Benchmark | 8.6% |
| 13-week Company Performance | 4.1% |
| 13-week Market Benchmark Performance | -4.1% |
| **13-week Relative Performance vs. Market Benchmark** | **8.2%** |
| 30-week Company Performance | -0.2% |
| 30-week Market Benchmark Performance | 0.6% |
| 30-week Relative Performance vs. Market Benchmark | -0.8% |

### Upside/Downside Volume — BULLISH



The level and trend of the Upside/Downside (U/D) volume ratio reveals whether institutional participation has been bullish or bearish as of late. Hormel Foods' U/D volume ratio of 1 is not only greater than 1 but also is better than its trailing average, indicating BULLISH institutional interest during the past several weeks.

### Timeliness Matrix™

Equity Valuation

| Relative Strength | Overvalued | Fairly Valued | Undervalued |
|---|---|---|---|
| Strong | | ■ | |
| Neutral | | | |
| Weak | | | |

Firms that are undervalued and currently showing near-term pricing strength score near the top right of the matrix.

Companies that are undervalued and showing near-term relative price strength could represent timely buys, as the stock may be attractive to both value and momentum investors. A cross section of the firm's equity valuation and its relative share price strength is shown in the matrix above. We tend to prefer undervalued stocks that have strong pricing momentum, also called Valuentum stocks.

# Hormel Foods HRL FAIRLY VALUED

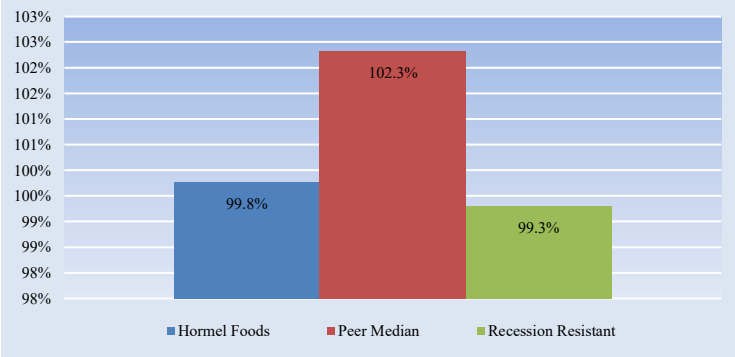
**Buying Index™** 6 **Value Rating**

| Economic Castle | Estimated Fair Value | Fair Value Range | Investment Style | Sector | Industry |
|---|---|---|---|---|---|
| Attractive | $31.00 | $25.00 - $37.00 | LARGE-CAP VALUE | Consumer Staples | Recession Resistant |

## Recession Resistant

**Recession Resistant** **FAIRLY VALUED**

We think the Recession Resistant industry is fairly valued at this time. The industry's market cap is trading between 80% and 120% of our estimate of its fair value based on our DCF process. Although we use a firm-specific ValueRisk™ measure to determine whether a firm is undervalued or overvalued based on our DCF process, we consider an industry to be undervalued if it is trading below 80% of our estimate of its fair value and overvalued if it is trading at over 120% of our estimate of its fair value. We think these fair value ranges are appropriate given the diversification benefits of holding a basket of stocks. Although there may be individual opportunities within the Recession Resistant industry, we don't find the industry as a whole attractive based solely on valuation.



The above bar chart reveals the price/fair value of the company, its peers, and the industry as a whole.

Shaded blue denotes that the firm has earned the highest rating for that respective category.

| Company Name | Ticker | Market Cap (USD-mil) | Investment Style | DCF Valuation | Relative Valuation | ValueCreation™ | ValueRisk™ | ValueTrend™ | Technicals | Relative Strength |

**Investment Highlights** (J)

• Apple is as much a brand as it is one of the world's most innovative companies. The firm is no longer known for its iPods and personal computers, as the proliferation of the iPhone over the past several years has been a sight to behold. The company's execution remains top notch, and we expect it to continue to roll out innovative products in phones and wearable technology, its most recent being product launch.

• Criticism over the firm's dependence on sales of the iPhone gained momentum in fiscal 2016, as the second quarter of the fiscal year marked the first quarterly sales decline in 13 years. High levels of demand for the iPhone 7 and multiple safety issues at rival Samsung have eased concerns for the time being.

• Apple's rollout of future iterations of the iPhone should propel its fundamentals higher. Though we're not embedding another blockbuster hit in our model, we wouldn't be surprised if Apple delivers another one from its pipeline. Perhaps only a dream five years ago, the popularity of the new Apple Watch is now worth watching, though it has yet to catch fire in the eyes of consumers.

• Investors should pay close attention to the firm's gross margin, which is expected to fall to 37.5%-38% in fiscal 2016 from 40% in fiscal 2015. Pricing and cost pressures may be unavoidable. A slight step back in fiscal 2016 should not be a major concern to investors given Apple's massive cash position and impressive track record.

• Apple's cash hoard is more than some of the market capitalizations of the largest companies in the S&P 500. The company retains tremendous flexibility in this regard, and we continue to expect dividend increases and share buybacks.

**Structure of the Computer Hardware Industry** — NEUTRAL

The computer hardware space, which spans the personal computer to the iPhone and iPad, is highly competitive. The industry is characterized by frequent product introductions and rapid technological advances that can cause dramatic market share shifts. Though some firms benefit from a strong brand, participants often price aggressively, pressuring margins. Firms are also subject to potential component shortages/disruptions, which can punish performance. Obsolescence may be an eventuality for some, and services revenue has become critical for others. We're neutral on the space.

# About Valuentum

@Valuentum, we strive to stand out from the crowd. Most investment research publishers fall into a few camps, whether it be value, growth, income, momentum, chartist or some variant of the aforementioned. We think each in its own right holds merit, but we think the combination of these approaches can be even more powerful. After all, stock price movements aren't just driven by investors of the value or growth variety, but by all market participants. Therefore, we look at stocks from a variety of investment perspectives in order to better understand and identify ideas. We want to provide relevant information.

The core of our process is grounded in rigorous discounted cash flow analysis and incorporates the concept of a margin of safety. We offer a fair value estimate for each company and provide a relative valuation assessment in the context of a company's industry and closest peers. A cross section of our ValueCreation™ and ValueRisk™ ratings provides a financial assessment of a company's business quality, while our ValueTrend™ rating offers insight into the trajectory of a firm's economic profit creation. The Economic Castle rating measures the magnitude of future economic value generation, and the Dividend Cushion ratio assesses the financial capacity of a company to keep raising its dividend.

Our analysis doesn't stop there. We also offer a technical evaluation of the stock as well as other momentum indicators. We not only want to reveal to readers which firms may be undervalued, in our view, but we also want to provide readers with information to help them assess entry and exit points. Most research publishers focus on arriving at a target price or fair value estimate, but may fall short of providing a technical assessment to bolster buy and sell disciplines. We strive to go the distance and provide readers with answers--not half the story.

An explanation of our approach would not be complete if we didn't describe our ideal stock idea. We're looking for companies that are undervalued--both on a DCF basis and versus peers--have strong growth potential, have a solid track record of creating economic profits for shareholders with reasonable risk, are strong cash flow generators, have manageable financial leverage, and are currently showing bullish technical and momentum indicators. For dividend growth ideas, we look for companies that have both the capacity and willingness to keep raising the dividend.

Can such stock ideas exist? Subscribe to Valuentum to receive our best investment ideas and analysis on hundreds of stocks, dividends, ETFs and more.

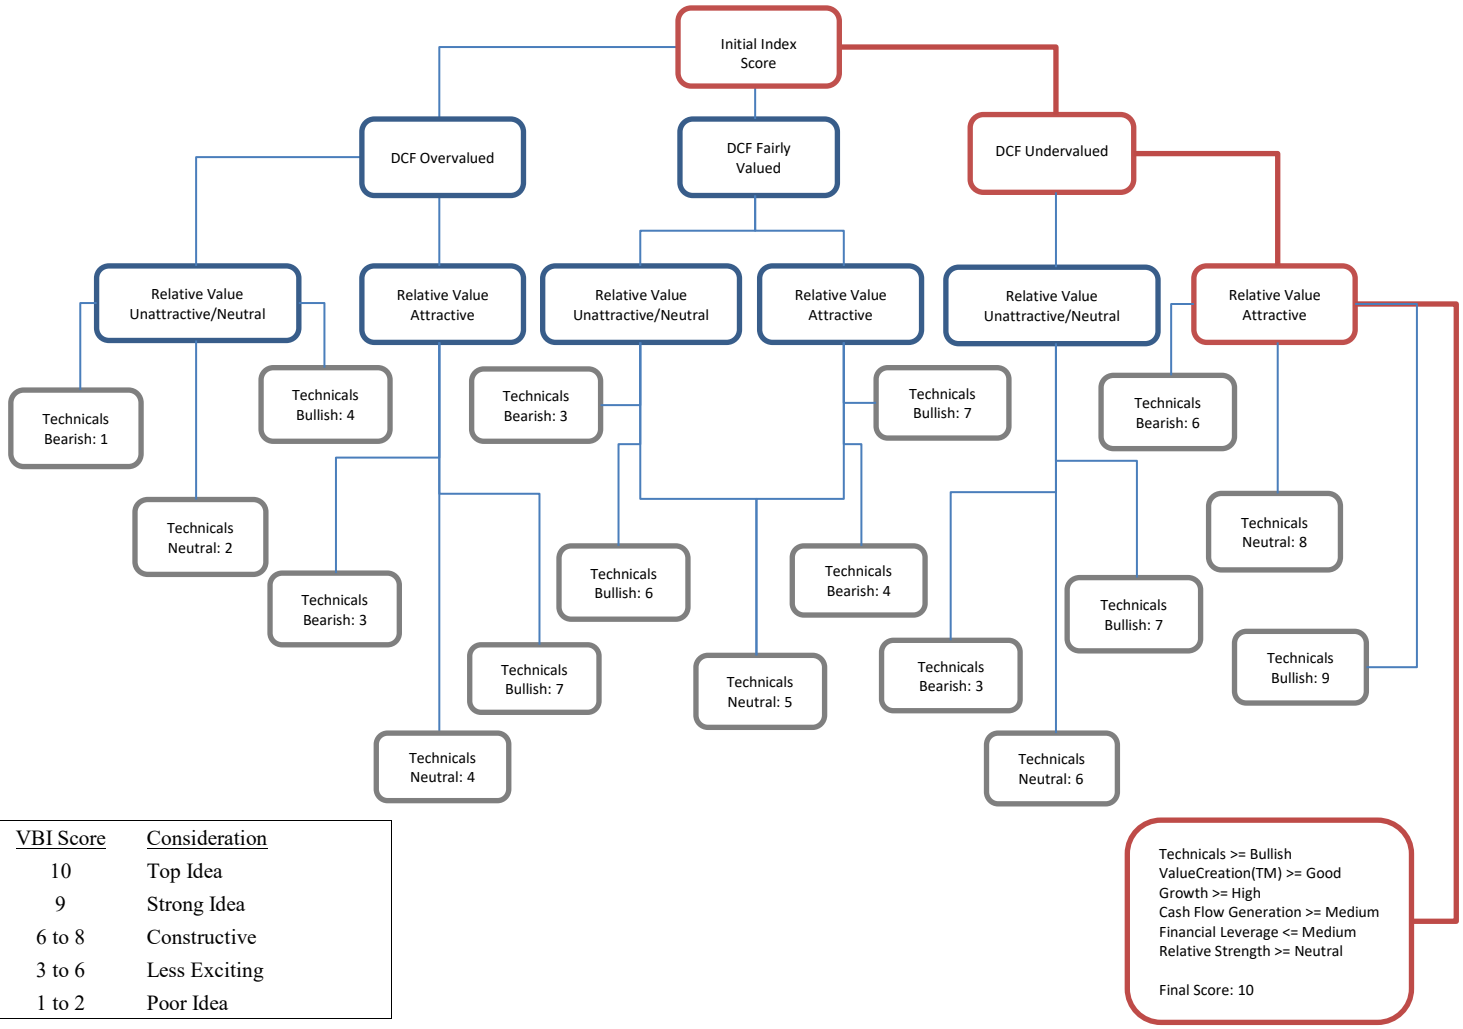
# Methodology for Picking Stocks - Valuentum Buying Index™ (VBI)

@Valuentum, we like to look at companies from a number of different perspectives. The Valuentum Buying Index (VBI) combines rigorous financial and valuation analysis with an evaluation of a stock's technicals to derive a rating between 1 and 10 for each company. The VBI places considerable emphasis on a company's discounted cash-flow (DCF) valuation, its relative valuation versus peers (both forward PE and PEG ratios), and its technicals in order to help readers assess entry and exit points on the most interesting ideas.

Let's follow the red line on the flow chart below to see how a company can score a 10, the best mark on the index. First, the company would need to be 'undervalued' on a DCF basis and 'attractive' on a relative value basis. The stock would also have to be exhibiting 'bullish' technicals. The firm would need a ValueCreation™ rating of 'good' or 'excellent', exhibit 'high' or 'aggressive' growth prospects, and generate at least a 'medium' or 'neutral' assessment for cash flow generation, financial leverage, and relative price strength.

This is a tall order for any company. Stocks that don't make the cut for a 10 are ranked accordingly, with the least attractive stocks, in our opinion, garnering a rating of 1. Most of our coverage universe registers ratings between 3 and 7, but at any given time there could be large number of companies garnering either very high or very low scores, especially at market lows or tops, respectively.

The Best Ideas Newsletter portfolio puts the VBI into practice.



| VBI Score | Consideration |
|---|---|
| 10 | Top Idea |
| 9 | Strong Idea |
| 6 to 8 | Constructive |
| 3 to 6 | Less Exciting |
| 1 to 2 | Poor Idea |

# Glossary

**Estimated Fair Value.** This measure is our opinion of the fair equity value per share of the company. If our forecasts prove accurate, which may not always be the case, we may expect a firm's stock price to converge to this value within the next 3 years.

**Fair Value Range.** The fair value range represents an upper bound and lower bound, between which we would consider the firm to be fairly valued. The range considers our estimate of the firm's fair value and the margin of safety suggested by the volatility of key valuation drivers, including revenue, gross margin, earnings before interest, and enterprise free cash flow (the determinants behind our ValueRisk™ rating).

**DCF Valuation.** We opine on the firm's valuation based on our DCF process. Firms that are trading with an appropriate discount to our fair value estimate receive an UNDERVALUED rating. Firms that are trading within our fair value range receive a FAIRLY VALUED rating, while firms that are trading above the upper bound of our fair value range receive an OVERVALUED rating.

**Relative Value.** We compare the firm's forward price-to earnings (PE) ratio and its price/earnings-to-growth (PEG) ratio to that of its peers. If both measures fall below the peer median, the firm receives an ATTRACTIVE rating. If both are above the peer median, the firm receives an UNATTRACTIVE rating. Any other combination results in a NEUTRAL rating.

**ValueCreation™.** This is a proprietary Valuentum measure. ValueCreation™ indicates the firm's historical track record in creating economic value for shareholders, taking the average difference between ROIC (without goodwill) and the firm's estimated WACC during the past three years. The firm's performance is measured along the scale of EXCELLENT, GOOD, POOR, and VERY POOR. Those firms with EXCELLENT ratings have a demonstrated track record of creating economic value, while those that register a VERY POOR mark have been destroying economic value.

**ValueRisk™.** This is a proprietary Valuentum measure. ValueRisk™ indicates the historical volatility of key valuation drivers, including revenue, gross margin, earnings before interest, and enterprise free cash flow. The standard deviation of each measure is calculated and scaled against last year's measure to arrive at a percentage deviation for each item. These percentage deviations are weighted equally to arrive at the corresponding fair value range for each stock, measured in percentage terms. The firm's performance is measured along the scale of LOW, MEDIUM, HIGH, and VERY HIGH. The ValueRisk™ rating for each firm also determines the fundamental beta of each firm along the following scale: LOW (0.85), MEDIUM (1), HIGH (1.15), VERY HIGH (1.3).

**ValueTrend™.** This is a proprietary Valuentum measure. ValueTrend™ indicates the trajectory of the firm's return on invested capital (ROIC). Firms that earned an ROIC last year that was greater than the 3-year average of the measure earn a POSITIVE rating. Firms that earned an ROIC last year that was less than the 3-year average of the measure earn a NEGATIVE rating.

**Cash Flow Generation.** Firms' cash flow generation capacity are measured along the scale of STRONG, MEDIUM, and WEAK. A firm with a 3-year historical free cash flow margin (free cash flow divided by sales) greater than 5% receives a STRONG rating, while firms earning less than 1% of sales as free cash flow receive a WEAK rating.

**Financial Leverage.** Based on the firm's normalized debt-to-EBITDA metric, we rank firms on the following scale: LOW, MEDIUM, and HIGH. Companies with a normalized debt-to-EBITDA ratio below 1.5 receive a LOW score, while those with a measure above 3 receive a HIGH score.

**Upside/Downside Volume.** Heavy volume on up days and lower volume on down days suggests that institutions are heavily participating in a stock's upward advance. We use the trailing 14-week average of upside and downside volume to calculate an informative ratio. We rank each firm's U/D volume ratio along the following scale: BULLISH, IMPROVING, DETERIORATING, and BEARISH.

**Investment Style.** Valuentum uses its own proprietary stock-classification system. Nano-cap: Less than $50 million; Micro-cap: Between $50 million and $200 million; Small-cap: Between $200 million and $2 billion; Mid-cap: Between $2 billion and $10 billion; Large-cap: Between $10 billion and $200 billion; Mega-cap: Over $200 billion. Blend: Firm's that we think are undervalued and exhibit high growth prospects (growth in excess of three times the rate of assumed inflation). Value: Firm's that we believe are undervalued, but do not exhibit high growth prospects. Growth: Firms that are not undervalued, in our opinion, but exhibit high growth prospects. Core: Firms that are neither undervalued nor exhibit high growth prospects.

**Company Vitals.** In this section, we list key financial information and the sector and industry that Valuentum assigns to the stock. The P/E-Growth (5-yr), or PEG ratio, divides the current share price by last year's earnings (EPS) and then divides that quotient by our estimate of the firm's 5-year EPS growth rate. The estimated normalized diluted EPS and estimated normalized EBITDA represent the five-year forward average of these measures used in our discounted cash flow model. The P/E on estimated normalized EPS divides the current share price by estimated normalized diluted EPS. The EV/estimated normalized EBITDA considers the current enterprise value of the company and divides it by estimated normalized EBITDA. EV is defined as the firm's market capitalization plus total debt, minority interest, preferred stock less cash and cash equivalents.

**Business Quality Matrix.** We compare the firm's ValueCreation™ and ValueRisk™ ratings. The box is an easy way for investors to quickly assess the business quality of a company. Firms that generate economic profits with little operating variability score near the top right of the matrix.

**Timeliness Matrix.** We compare the company's recent stock performance relative to the market benchmark with our assessment of its valuation. Firms that are experiencing near-term stock price outperformance and are undervalued by our estimate may represent timely buys.

**Range of Potential Outcomes.** The firm's margin of safety is shown in the graphic of a normal distribution. We consider a firm to be undervalued if its stock price falls along the green line and overvalued if the stock price falls along the red line. We consider the firm to be fairly valued if its stock price falls along the yellow line.

**Return on Invested Capital.** At Valuentum, we place considerable emphasis on return on invested capital (both with and without goodwill). The measure focuses on the return (earnings) the company is generating on its operating assets and is superior to return on equity and return on assets, which can be skewed by a firm's leverage or excess cash balance, respectively.

**Technical Evaluation.** We evaluate a firm's near-term and medium-term moving averages and money flow index (MFI) to assign each firm a rating along the following scale: VERY BULLISH, BULLISH, NEUTRAL, BEARISH, and VERY BEARISH.

**Stock Price Relative Strength.** We assess the perfomance of the company's stock during the past quarter, 13 weeks, relative to an ETF that mirrors the aggregate performance of constituents of the stock market. Firms are measured along the scale of STRONG, NEUTRAL, and WEAK. Companies that have outperformed the market index by more than 2.5% during this 13-week period receive a STRONG rating, while firms that trailed the market index by more than 2.5% during this 13-week period receive a WEAK rating.

**Money Flow Index (MFI).** The MFI is a technical indicator that measures buying and selling pressure based on both price and volume. Traders typically use this measure to identify potential reversals with overbought and oversold levels. We use a 14-week measure to rank firms along the following scale: EXTREMELY OVERBOUGHT (>90), OVERBOUGHT (80-90), NEUTRAL (20-80), OVERSOLD (10-20), EXTREMELY OVERSOLD (0-10).
